

Script for talking to children when someone has died from Covid-19

I have something very sad to tell you. (Name) died. Do you

remember I told you that they had an illness called corona virus

and the doctors and nurses were trying to help (name) get better?

Everyone tried really hard but the corona virus was too strong and

(name's) body couldn't get better. (Name's) lungs stopped working and

their heart stopped beating and they died. Sometime you might

feel sad, scared or angry because (name) isn't here any more. It is

ok to feel sad, scared and angry when someone dies. I will

look after you.
